

40 years of history dedicated to precision

Ever since 1977 the Emmegi company has specialized in the machining of turned brass parts (4 to 60mm diameters), building a solid reputation based on its commitment and competence.

This reliability was rewarded with the Quality Management System Certification according to the UNI EN ISO 9001:2008 standard. The customer's expectations can be met on a daily basis. In fact, our team are time served staff and some have a lifetime of skills and experience that they bring to their work to ensure the highest standards are maintained at our high-tech lathes based operation. CAD and software combined with a real-time quality control, oversee all the phases of the production cycle.

Emmegi works in different international markets such as automotive, high pressure tech, hydrothermal, sanitary, and gas valves, offering very high technical expertise to every client. Customer care is very important to the company and it strives to ensure that every customer is provided with the greatest possible care and commitment.
